Public Hearing – Proposed Local Law 2020-1 to Repeal Local Law 2016-9 that Removed the Real Property Tax Exemption for Solar, Wind or Farms Waste Energy

Town Assessor Patrick Duffy gave a presentation on the different types of energy systems that would qualify for the exemption and the impact the exemption would have if the current properties that qualify apply for the exemption.

SEQR –

PART II – Short Environmental Assessment Form

Attorney Frateschi reviewed Part II of the short environmental assessment form with the Town Board. The Town Board determined that each of the environmental factors would have no more than a small to moderate impact. After further discussion, the Board agreed that there would be no significant environmental impact by adopting Local Law 2020-1 to repeal Local Law 2019-6 that Removed the Real Property Tax Exemption for Solar, Wind or Farms Waste Energy.

Kevin Nichols, Nichols Energy Solutions, spoke in favor of the proposed local law. Mr. Nichols stated that the town of Manlius is an outlier in terms of residential solar and only one other municipality has opted out of the exemption. Mr. Nichols stated that he has had customers in the town that have not moved forward with the installation of solar panels because they are not sure what would happen to their assessment. Mr. Nichols stated that homeowners have been frustrated by this and if Manlius would like to see more clean energy this exemption will help.

Dave Lenson, Manlius, spoke in favor of the exemption. Mr. Lenson stated that promoting solar development is beneficial and would be encouraged.

Casey Guereschi, Manlius, spoke in favor of the exemption. Mr. Guereschi stated that he has solar panels at his home and was not aware that the town did not offer this exemption. Mr. Guereschi stated that he turned the exemption form in at the assessment office as was never notified that the exemption did not exist. Mr. Guereschi stated that his assessment did go up and he asked where the additional revenue was being spent.

Assessor Duffy discussed how the exemption is applied and stated that the Fayetteville Manlius School District has opted out as well.

Discussion ensued regarding why the previous Town Board had opted out of the exemption.

Councilor Green stated that there was a concern at the time regarding the tax distribution throughout the town.

Supervisor Theobald discussed the other exemptions that are available for town residents.

Councilor Kriesel discussed the benefits of solar arrays in the community. Councilor Kriesel stated that when an individual goes solar the neighbors near the solar array benefit by using the solar energy that is added to the grid.

Discussion ensued regarding previous solar array applications and how the larger solar arrays impact the energy on the grid.

Roseanne Lorefice, Manlius, commended the Town Board for taking up the issue. Ms. Lorefice stated that measures such as these will encourage residents to go solar and improve the environment.

Ron Zimeck, Manlius, stated that he was surprised to hear that the town does not participate in the solar exemption. Mr. Zimeck stated that he installed solar at his home and his assessment went up. Mr. Zimeck stated that he does not know if adding solar to his home did improve the value. Mr. Zimeck stated that he thought he lived in a progressive community and asked the town board to approve this local law to encourage solar.

Assessor Duffy discussed the property value of a home with solar and without solar.

With there being no further comments from the public, Councilor Green made a motion, seconded by Councilor Waters, to close the public hearing at 7:17 PM in the matter of proposed Local Law 2020-1 to repeal Local Law 2016-9 that Removed the Real Property Tax Exemption for Solar, Wind or Farms Waste Energy.

Councilor Kriesel encouraged her fellow town board members to adopt the proposed local law and to be mindful of the financial return of this. Councilor Kriesel stated she will continue to focus on policies that will help address the climate crisis.

Supervisor Theobald stated that he would like the Town Board to consider PILOT programs for future larger commercial solar applications.

Councilor Kriesel stated that she would like to get information on how other communities address large scale solar.

Councilor Kriesel made a motion, seconded by Councilor Deer, to adopt the proposed Local Law to Repeal Local Law 2016-9 that Removed the Real Property Tax Exemption for Solar, Wind or Farms Waste Energy.

Discussion: The Town Board discussed whether or not the requirement for a PILOT program for large scale solar would need to be added before the law was adopted. After discussion it was determined that the PILOT information did not need to be added now and could be considered in the future when a large-scale solar project was submitted.

Onondaga County Department of Water Environment Protection (WEP) – Consolidated Sewage Disposal System Lease.

Frank Mento and Shannon Harty, Onondaga County Department of Water Environment Protection Agency, presented a proposal to the Town Board for a Consolidated Sewage Disposal System Lease to create a Consolidated Sanitary Sewer District. The lease would be a 40-year lease that would allow WEP to maintain the sewers. The town residents would no longer see a town sewer charge and a county sewer charge.

- The proposal would allow the County to address the broken sewer assets that allow inflow and infiltration into the collection system.
- The current inflow and infiltration can cost up to 2.5 million dollars in WEP operating expenses and the DEC has issued permit violations.
- Consolidation would put all operations, maintenance and capital investments under WEP and residents would now have a single sewer charge.

The Town Board asked several questions regarding the proposal and there was a lengthy discussion regarding how town residents' sanitary sewer district charges would be passed on to residents. The Town Board discussed the terms of lease and confirmed that there was an opt out clause.

Supervisor Theobald noted that this would only effect residents who are currently in a sanitary sewer district and not a resident that is on septic.

Councilor Green asked what would happen if one municipality / district didn't participate. Mr. Mento stated that they are optimistic that will not be an issue.

Councilor Denton asked where the stormwater would go that is now getting into the sewer pipes. Ms. Harty stated that there is a stormwater drainage system that the stormwater will drain into.

Councilor Deer asked what percentage of the infiltration is coming from the town of Manlius? Mr. Mento stated that the County has not calculated that as this is a county-wide problem that can be solved by working together.

Councilor Deer asked how WEP plans to make the repairs and if this would result in a larger county government? Mr. Mento and Ms. Harty stated that the County would have a schedule of repairs and that not all of the repairs would occur at once.

After discussion the Town Board decided that they would like to have a period of public input on a major decision such as this. The Town Board tabled the matter until the next meeting.

Board of Assessment Review Appointment

After discussion the Town Board decided that it would like to advertise for the position and tabled the matter to allow for advertisement and interviews.

DRAFT

Onondaga County Sewer Consolidation

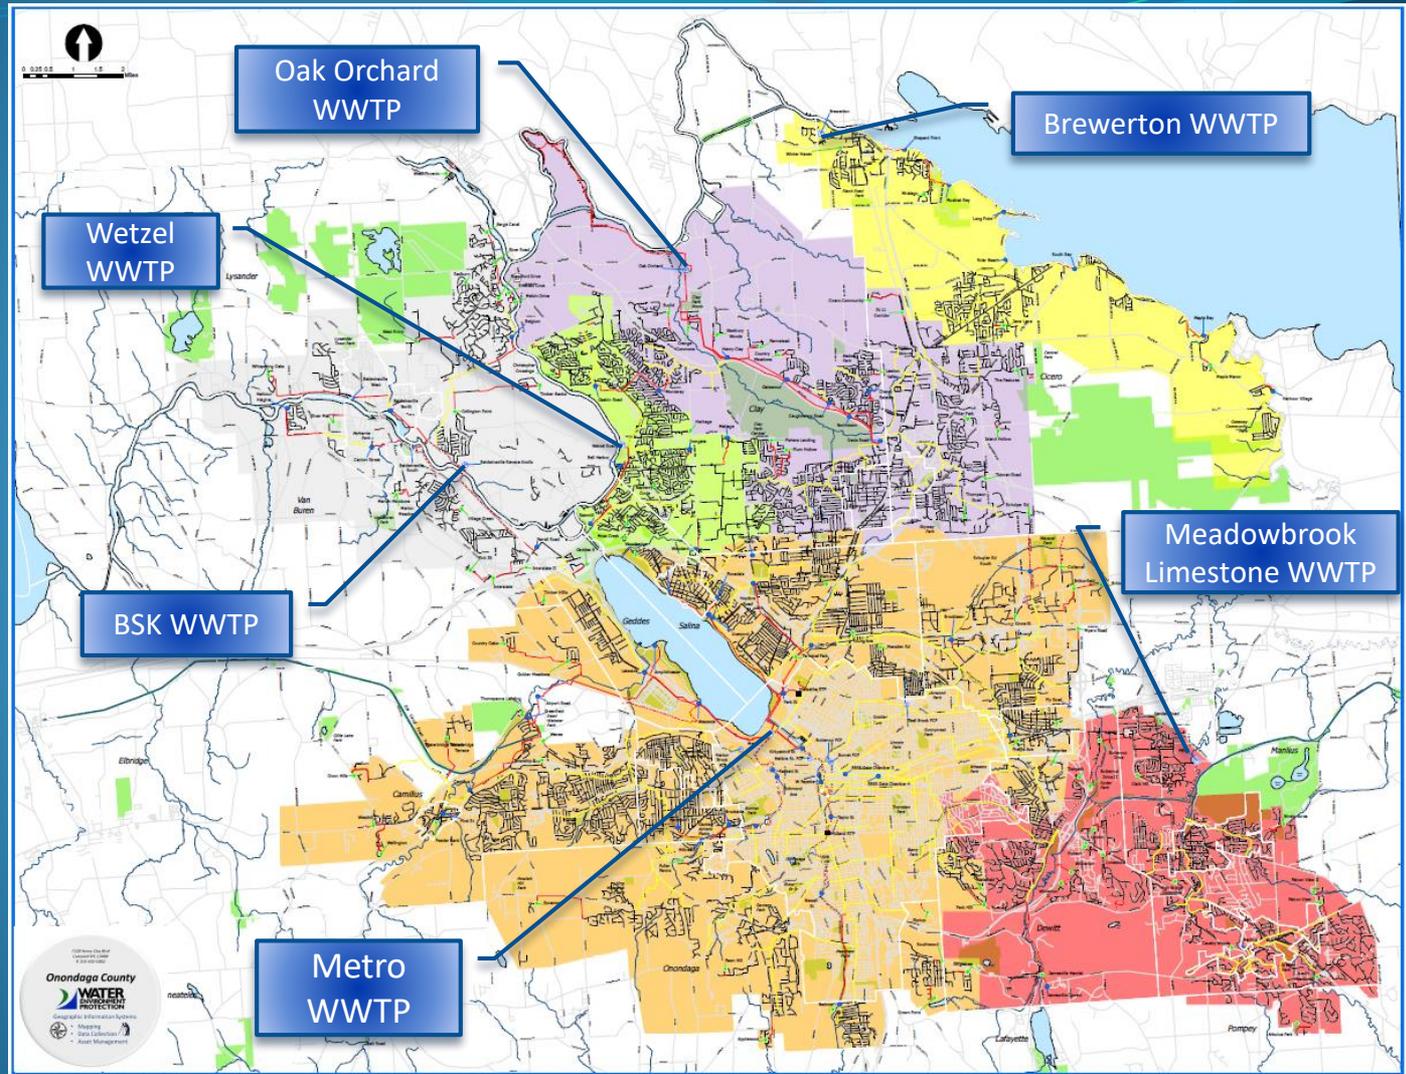

J. Ryan McMahon, II
County Executive

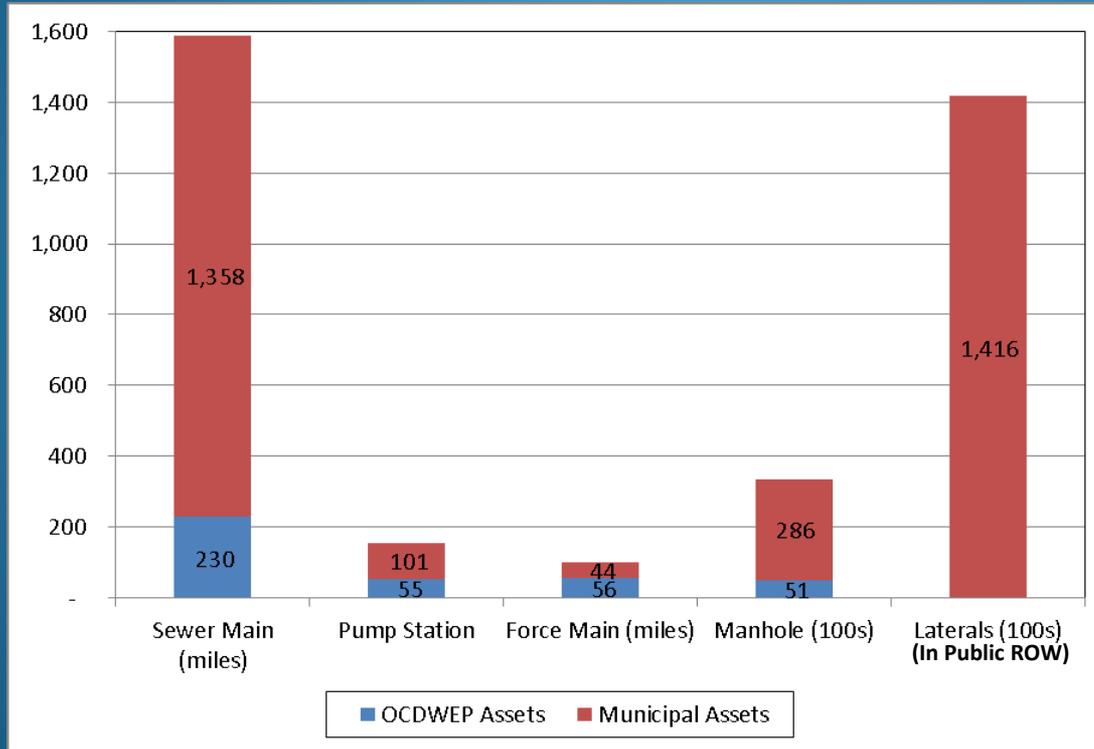

Consolidated Sanitary District (“CSD”):

- Six (6) sewer service areas
- 20 municipalities
 - 1 City
 - 11 Towns
 - 8 Villages
- Complex network of sewer pipes, pump stations, and treatment facilities

J. Ryan McMahon, II
County Executive

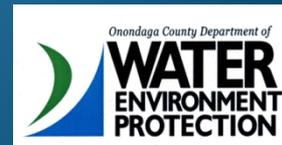

CSD – Collection System Assets

- Municipal assets under 20 different owners
- Number of assets is significant
- Varying degrees of age & condition

J. Ryan McMahon, II
County Executive

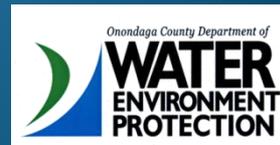

Current Sewer Structure

County Sewer Department (WEP)	Local Municipalities
<ul style="list-style-type: none">• WWTP, PS, and Trunk Sewers	<ul style="list-style-type: none">• Local Sewers, Small PS, Manholes, Laterals
<ul style="list-style-type: none">• Sewer Fund with Budget for O&M and Capital Investment	<ul style="list-style-type: none">• Some have Sewer Funds and others use General Fund. Budget investment levels vary.
<ul style="list-style-type: none">• Long Term Capital Plan - infrastructure upgrade and replacement	<ul style="list-style-type: none">• Limited capital investment
<ul style="list-style-type: none">• Annual Sewer Unit Charge - \$448.81	<ul style="list-style-type: none">• Wide range of fees 0-\$400 per year

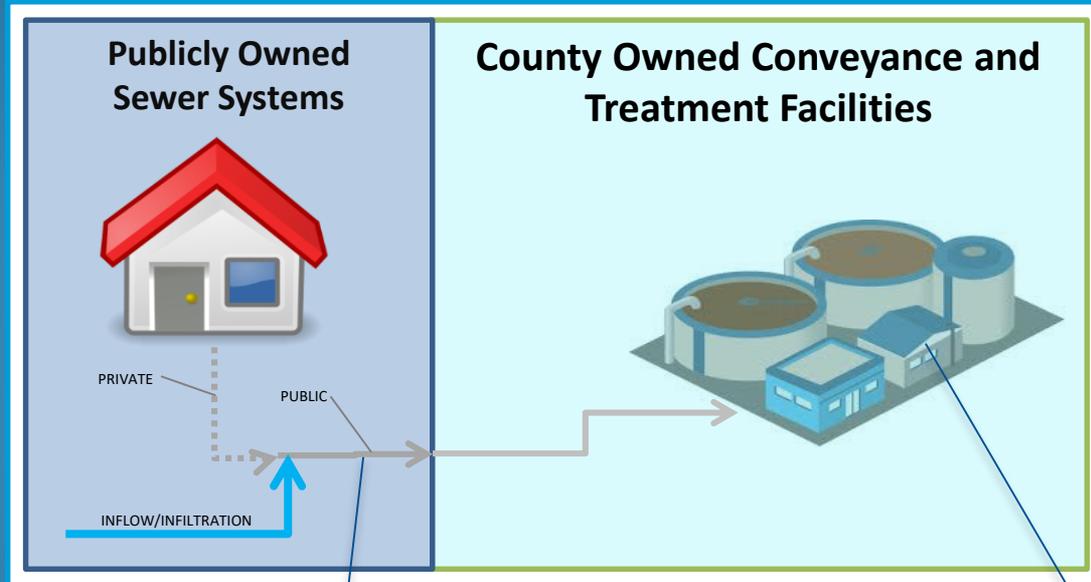

Note: Current Intermunicipal Agreements (IMAs) provide support only. Costs are billed back to each municipality. IMA support does not replace broken assets (ie. Collapsed sewer laterals).

J. Ryan McMahan, II
County Executive

Segmented Ownership

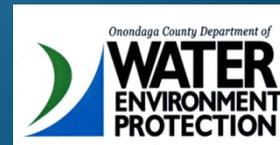

Broken local sewer assets allow inflow & infiltration into the sewer collection system

Excess flow from inflow & infiltration increases operating cost of WWTPs, exceeds treatment capacities and results in permit violations.

J. Ryan McMahan, II
County Executive

Current I/I flows can cost up to \$2.5 million/month in WEP operating expenses.

Current I/I flows equivalent to 90,000 single family homes. This capacity for economic and other development is lost.

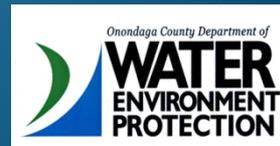

Current base sewer flows equate to ~190,000 single family homes.

Meadowbrook-Limestone WWTP is one of the most vulnerable to regulatory penalties.

J. Ryan McMahon, II
County Executive

Action is Needed...NOW.

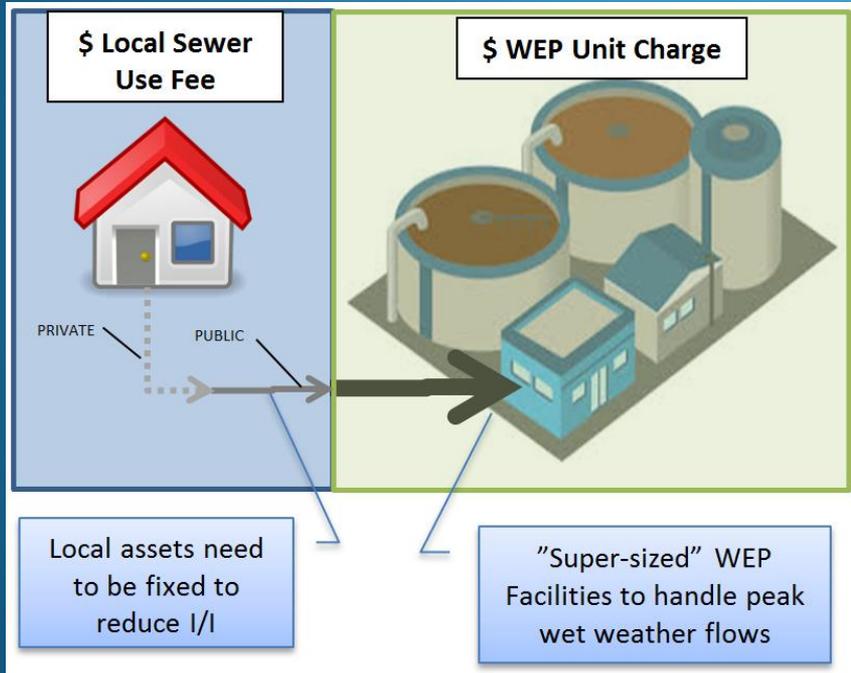

We have two choices...

J. Ryan McMahon, II
County Executive

Option 1 – Do Nothing (Continue as is)

- I/I continues and gets worse
- Regulatory pressures and penalties surge
- Local municipalities have limited resources to maintain and fix their assets.
- WEP forced to spend millions to super-size facilities which consume prime real estate.
- Sewer customers pay two sewer fees – County Unit Charge and Local Sewer Fee

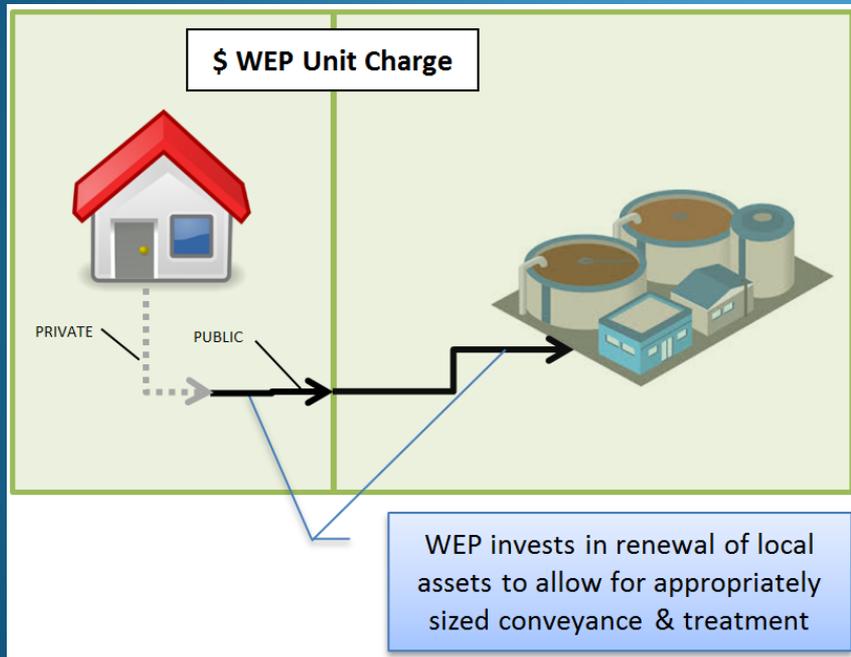

J. Ryan McMahon, II
County Executive

Is this really what we want on Onondaga Lake?

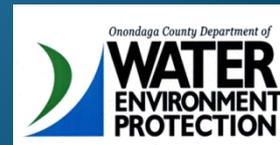

Option 2 – “Consolidation”

- All operations, maintenance and capital investment falls under WEP
- Community benefits from efficiencies and economies of scale
- WEP, with robust resources, attacks I/I
- Financing falls under one jurisdiction eliminating competition for grant funding.
- Consolidates all costs into a single sewer fund & budget
- Single sewer unit charge

J. Ryan McMahon, II
County Executive

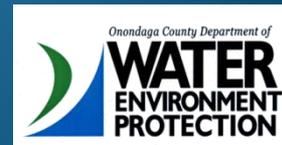

Consolidation is the best solution

- WEP has the knowledge, tools and expertise to move quickly and comprehensively to address I/I
- Consolidation streamlines administrative efforts
- Consolidation will provide economies of scale savings (\$\$ saved!)
- County relieved of immense regulatory pressures and penalties (\$\$ saved!)
- County relieved of the need for expensive plant upgrades and expansions (\$\$ saved!)

Ensures uniform levels of service and customer cost – no matter where you live!

J. Ryan McMahon, II
County Executive

We are all in this together!

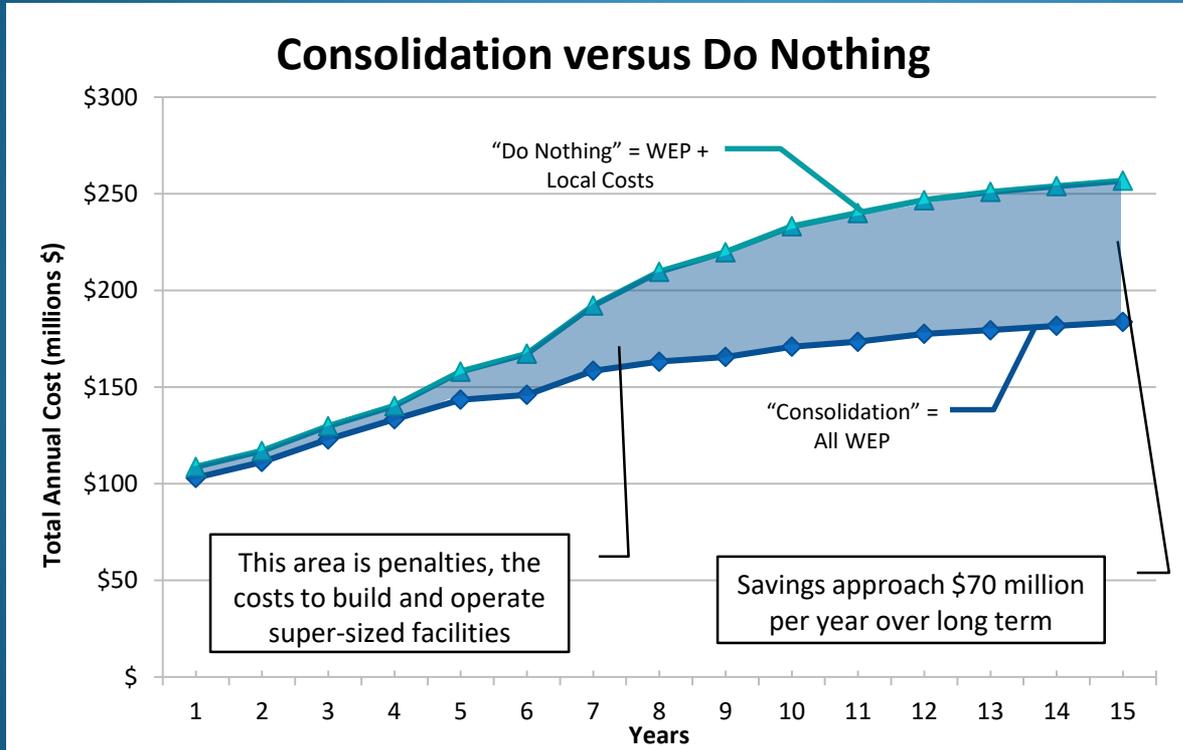

UNITED IN WATER

J. Ryan McMahon, II
County Executive

Annual Cost Projections

- “Do nothing” includes
 - Cost of WEP “super-sized” facilities
 - Costs for 20 municipalities
 - Assumes municipalities make same investments as Consolidation efforts
- “Consolidation” includes
 - All O&M and Capital from lateral to WWTP under WEP Budget

Consolidation is the best long term investment!

J. Ryan McMahon, II
County Executive

Next Steps

- Execute lease agreements for MBLS municipalities
- Authorize County Executive to sign Lease Agreements
- Initiate \$9 million sewer rehabilitation in MBLS
- Prioritize other municipalities by sewer service areas with greatest I/I issues and capacity restrictions.

J. Ryan McMahon, II
County Executive

SEWAGE DISPOSAL SYSTEM LEASE

THIS SEWAGE DISPOSAL SYSTEM LEASE entered into on _____, 2020, by and between the _____ (the “Landlord”), _____ under the laws of the State of New York, and the COUNTY OF ONONDAGA (the “Tenant”), a municipal corporation under the laws of the State of New York.

WITNESSETH:

WHEREAS, the Landlord owns and operates a Sewage Disposal System, as hereinafter defined; and

WHEREAS, the Tenant is the owner and operator of the Onondaga County Consolidated Sanitary District (CSD) inclusive of six wastewater treatment plants and other collection system conveyance infrastructure within the service area (the “CSD Infrastructure”) to which the Landlord’s Sewage Disposal System conveys sewage; and

WHEREAS, excessive amounts of water within the CSD through either Inflow or Infiltration (“I&I”) create an undue burden on the CSD Infrastructure operation and impact both regulatory compliance and operational expenses; and

WHEREAS, for the assurance of future asset renewal, regulatory compliance, management of Sewage Disposal System and treatment plant capacity, and consistent Performance Standards, as hereinafter defined, throughout the CSD, the PARTIES hereto desire to enter into a Lease Agreement for the operation and maintenance of the Sewage Disposal System; and

WHEREAS, each municipality owning a Sewage Disposal System has varying degrees of asset inventory, age and condition, thereby requiring a wide spectrum of maintenance and repairs or operational capability. The City of Syracuse has certain combined Sanitary/Storm-water sewers (“Combined Sewers”), which in itself creates another set of regulations and challenges; and

WHEREAS, each municipality has varying degrees of financial capabilities and plans for maintenance and replacement of components of its Sewage Disposal System. Some have well established sewer funds with cash reserves and are able to prepare and act on projects regularly; however, because of financial limitations or different priorities for the application of current revenues investment is often deferred; and

WHEREAS, emergency repairs of these “out of sight” assets have become the norm for municipalities and the reality is that emergency remedies are often significantly more expensive than proactive management – further reducing the financial capability to properly operate and maintain the Sewage Disposal System; and

WHEREAS, the CSD Infrastructure is monitored, measured, and strictly controlled by New York State Pollutant Discharge Elimination System (SPDES) permits, which are attached to

and part of the CSD administration. To that end, the Tenant is directly responsible to State and Federal regulators for the “end of pipe” treatment plant discharge. The Tenant is subject to fines and penalties when CSD Infrastructure malfunctions or fails to meet permit limits. The challenges are amplified in wet weather conditions where flows increase and become unpredictable both in quantity and quality as a direct result of the I&I; and

WHEREAS, there is a direct link between the state of our sewer infrastructure and the ability to promote and execute economic development opportunities. New builds, expansions and job creation should not be prolonged, stalled or limited by the inadequate capacity of CSD Infrastructure or Sewage Disposal System assets; and

WHEREAS, the local environment is enjoyed by the whole community. Clean, recreational and diverse water bodies enrich the quality and character of life in Central NY. Section 4.1 Lease of Sewage Disposal System.

Section 4.1.1 In order to enable Tenant to improve, modify, upgrade, operate and maintain the Sewage Disposal System, Landlord leases the Sewage Disposal System to Tenant and Tenant leases the Sewage Disposal System from Landlord for the Term for operation as a Sewage Disposal System. By virtue of this Lease, Landlord intends to convey to Tenant by lease a leasehold interest in all of Landlord's right, title and interest in and to the Sewage Disposal System in order to enable Tenant to operate the Sewage Disposal System as provided herein. Landlord and Tenant acknowledge that the description of the Sewage Disposal System set forth in Exhibit "A" has been compiled from the best available information, has been reviewed by their respective staff and consultants and is believed to be reasonably complete and accurate. Landlord and Tenant agree to cooperate in continuously reviewing the use and description of the Sewage Disposal System and in the event that it is determined that the description of the Sewage Disposal System needs to be amended to conform to the actual use of the Sewage Disposal System or to correct or update the description of the Sewage Disposal System to make it more accurate, Landlord and Tenant shall mutually agree to modify Exhibit "A" as necessary by

executing an amendment thereto to accomplish any of the foregoing purposes and such amendment shall become a part of this Lease; provided that no such amendment shall be delivered if the effect of such amendment is to impair the ability of Tenant to operate the Sewage Disposal System as provided herein. Landlord shall provide Tenant with copies of such documents and records as may be reasonably necessary to effectuate the purpose of this Lease.

Section 4.1.2 By virtue of this Lease, Landlord designates to Tenant, and Tenant acquires, succeeds to and assumes the exclusive right, responsibility and authority to, inter alia, occupy, operate, control, maintain, inspect, plan and use the Sewage Disposal System, including all lands, buildings, improvements, structures, easements, rights of access, fixtures, equipment, materials, furnishings, all other Personal Property and all other privileges and appurtenances comprising or pertaining to the Sewage Disposal System. In connection therewith and in accordance with this Article V, Tenant shall pay all costs of operating, using, repairing, maintaining, replacing, enlarging, extending, and improving the Sewage Disposal System. Tenant shall not cause or permit any waste, damage or injury to the Sewage Disposal System and shall keep the Sewage Disposal System in good condition and repair (reasonable wear and tear, obsolescence and damage by act of God, fire or other causes beyond the control of Tenant excepted).

Section 5.1.2 Landlord hereby grants to Tenant, to the extent that it has the authority and jurisdiction to and/or authorizes Tenant and designates Tenant as its agent for the purposes of applying for sewer system construction permits, as needed, for repairs, replacements, modifications and improvements at the Sewage Disposal System, and authorizes Tenant to file plans and specifications with the DEC and any other applicable governmental agency for all such projects, as Tenant deems necessary; provided that no such modifications shall limit the utilization of the Sewage Disposal System by current Sewer Customers nor eliminate service to any portion of the Sewage Disposal System, except as is needed for repairs or maintenance. Upon execution of this Lease, Landlord shall furnish Tenant with a letter authorizing Tenant to file such plans and specifications with any required governmental agency, including the DEC, for all such projects.

Section 5.1.3 During the Term, Landlord shall be relieved from all further costs and responsibility arising from or associated with the control, operation and maintenance of the Sewage Disposal System, except as otherwise provided in this Lease.

Section 5.2 Improvements to Sewage Disposal System. During the Term, Tenant shall be solely responsible and hereby is granted the authority to make such rehabilitation of and replacements and improvements to the Sewage Disposal System as it determines, in its sole discretion, to be necessary in order to keep the Sewage Disposal System in compliance with the Performance Standards, and to make such capital improvements as Tenant deems necessary in Tenant's sole discretion or as may be set forth in the Capital Improvement Program. Landlord shall have no right or responsibility to make any repairs or otherwise maintain the Sewage Disposal System at any time during the Term. Proposals for the expansion of or additions to the Sewage Disposal System initiated by Landlord may be implemented only after Tenant determines that the Sewage Disposal System and/or CSD Infrastructure has the capacity to accommodate the proposed expansion or addition.

Section 5.3 Liability of the Landlord for Tenant Costs and Expenses. Consistent with this Article V, it is understood and agreed by the PARTIES that Landlord shall be under no obligation to pay any of the costs and expenses incurred by Tenant for the operation, maintenance, management, repair or improvement of the Sewage Disposal System.

Section 5.4 Miscellaneous Provisions Related to Operation, Maintenance and Improvement of Sewage Disposal System.

Section 5.4.1 Landlord hereby provides to Tenant without the requirement for any other application, permit request or any other action, unlimited permission to use streets, highways, alleys, and/or easements for the purpose of improving, modifying, operating and maintaining and constructing improvements to the Sewage Disposal System. In the event of such construction, Tenant shall request Landlord assist in obtaining any other rights-of-way not provided by the Landlord to any streets, highways, and alleys as may be reasonably required by Tenant. Tenant shall inform Landlord and coordinate with Landlord's highway department for any traffic pattern modifications or impairments required by any construction work. Tenant and Landlord shall meet to review the construction and its impact on their respective operations. Tenant shall restore all existing structures and/or improvements laying in the right-of-way of construction to as good a condition as before the construction took place. The improvements shall become part of the Sewage Disposal System.

ARTICLE VI – PAYMENTS

Section 6.1 Lease Payment.

ARTICLE VII – ASSIGNMENT AND ASSUMPTION OF RIGHTS AND LIABILITIES

Section 7.1 Assignment by Tenant. Tenant may not assign this Lease, in whole or in part, or otherwise transfer or encumber Tenant's leasehold estate without consent of Landlord, which consent shall not be unreasonably withheld; provided however, that no Landlord consent shall be required if Tenant assigns this Lease to an authority or other legal entity duly constituted to take on the obligations set forth herein and such entity assumes all of the obligations under the Lease. Upon any permitted assignment and assumption, Tenant shall be released from any obligation or liability to Landlord for the performance of all of Tenant's covenants and obligations under this Lease arising from and after the date of such assignment.

Section 7.2 General Assumption by Tenant. Tenant hereby assumes, accepts and becomes liable for all other lawful obligations, promises, covenants, commitments and other requirements of Landlord in respect of the Sewage Disposal System, whether known or unknown, contingent or matured, and shall perform all of the duties and obligations and shall be entitled to all of the rights of Landlord in respect of the Sewage Disposal System under any ordinances, agreements or other instruments and under law. Consistent with this Article VII, this assumption includes, and there shall be transferred to Tenant all licenses, permits, approvals or awards related to the Sewage Disposal System, all grant agreements, all grant pre-applications, the right to receive the balance of any funds payable by third parties under the agreements, the right to receive any amounts payable by third parties to Landlord on the Effective Date and amounts paid to Landlord after the Effective Date, as well as the benefit of contracts and agreements, and all of Landlord's duties, liabilities, responsibilities and obligations with respect to the Sewage Disposal System, except for any obligations or liabilities being contested in good faith by Tenant until such time as resolved.

ARTICLE VIII – INSURANCE

Section 8.1 Insurance. From and after the Effective Date, Tenant shall, at its own expense, obtain and maintain public liability insurance (covering bodily and personal injury, property damage and contractual liability), automobile liability insurance and worker's compensation insurance for the operation of the Sewage Disposal System and, to the extent if any that it deems it appropriate to, keep the Sewage Disposal System insured against any casualty loss, in commercially reasonable amounts, provided that Tenant shall not be required to carry a particular type of insurance coverage as set forth in this Section 8.1 during any period that such insurance is not available in the insurance market of the United States at commercially reasonable rates.

All such insurance shall name Landlord as an insured or an additional insured and as a certificate holder, as its interests may appear. Such coverage and policies shall not be materially modified or terminated without at least thirty (30) days' prior written notice to Landlord, unless comparable coverage is provided under the modified policy or in a replacement policy. Upon Landlord's request no more frequently than once a year, Tenant shall provide Landlord with copies of certificates of insurance showing the premiums fully paid and copies of the policies, including any endorsements.

The insurance required of Tenant by this Lease in the amounts, with the coverage and other features herein required, may be supplied by a self-insurance program of Tenant; provided that such self-insurance program will provide the coverage required herein.

Notwithstanding, the foregoing insurance requirements shall not be applicable for as long as Tenant elects to self-insure.

Section 8.2 Destruction or Taking of Sewage Disposal System.

(a) If during the Term, any portion of the Sewage Disposal System is damaged or destroyed by fire or other casualty, Tenant shall repair, restore, rebuild or replace the damaged or destroyed portion of the Sewage Disposal System and complete the same as soon as reasonably possible, to at least the condition they were in prior to such damage or destruction, except for obsolescent Facility or changes in design or materials as may then be necessary to achieve the Performance Standards.

(b) In the event of any taking of the Sewage Disposal System or any part thereof in or by condemnation or other eminent domain proceedings pursuant to any Applicable Laws, or by reason of the temporary requisition of the use or occupancy of the Sewage Disposal System or any part thereof by any governmental entity (each a "Taking"), Tenant shall promptly notify Landlord upon receiving notice of such Taking or commencement of proceedings therefor. Tenant shall then, if requested by Landlord, file or defend its claim thereunder and prosecute the same with due diligence to its final disposition. Subject to the terms of any applicable Master Bond Ordinance, all proceeds or any award or payment in respect of any taking are hereby assigned and shall be paid to Tenant, and Tenant is permitted to take all steps reasonably necessary in its discretion to notify the condemner of such assignment. Such award or payment shall be applied to the Sewage Disposal System as necessary to achieve the Performance Standards.

(c) If the Sewer Disposal System or any portion thereof shall be in whole or in part destroyed or damaged as a result of any cause whatsoever, or a Taking occurs with respect to the Sewage Disposal System or any portion thereof, there shall be no abatement, diminution or reduction in any Lease Payment payable hereunder.

(d) Landlord agrees that it shall not commence any proceedings against the Sewage Disposal System that would constitute a Taking of all or any part of the Sewage Disposal System if the effect of such Taking is to render it impracticable for the Sewage Disposal System to furnish sewer service to Tenant's customers in accordance with the Performance Standards.

(b) Landlord's or Tenant's failure to insist upon the strict performance of any agreement, term, covenant or condition of this Lease or to exercise any right or remedy for breach of or Event of Default under this Lease shall not constitute a waiver of any such breach or Event of Default. No waiver of any breach or Event of Default shall affect or alter this subsection and every term, covenant, condition and provision of this Lease shall continue in full force and effect with respect to any other then existing or subsequent breach or Event of Default.

(c) Each right and remedy provided in this Lease shall be cumulative and shall be in addition to every other right or remedy provided for in this Lease or now or later existing at law or in equity either by statute or otherwise. Landlord's or Tenant's exercise of any one or more of its rights or remedies shall not preclude Landlord's or Tenant's simultaneous or later exercise of any or all of its other rights or remedies hereunder.

- (f) Landlord shall immediately deliver to Tenant any notices received by Landlord from any governmental authority or agency or any third party related to the Sewer System or the Sewage Disposal System.
- (g) Landlord shall immediately deliver to Tenant any notice, written or oral, received by Landlord related to any problems, issues or damage to the Sewage Disposal System.
- (h) It is the expectation of the Tenant that, upon the retirement of Existing Financing or sufficient Current Surplus to pay any Existing Financing obligations, it shall no longer be necessary for Landlord to charge users for sewer service.

Section 10.2 Covenants of Tenant. Throughout the Term, Tenant covenants and agrees as follows:

Dear Alexandra Vitulano:

Thank you for requesting the comments of the Office of Parks, Recreation and Historic Preservation (OPRHP). We have reviewed the project in accordance with the New York State Historic Preservation Act of 1980 (Section 14.09 of the New York Parks, Recreation and Historic Preservation Law). These comments are those of the OPRHP and relate only to Historic/Cultural resources. They do not include potential environmental impacts to New York State Parkland that may be involved in or near your project. Such impacts must be considered as part of the environmental review of the project pursuant to the State Environmental Quality Review Act (New York Environmental Conservation Law Article 8) and its implementing regulations (6 NYCRR Part 617).

Based upon this review, it is the opinion of OPRHP that no properties, including archaeological and/or historic resources, listed in or eligible for the New York State and National Registers of Historic Places will be impacted by this project.

If further correspondence is required regarding this project, please be sure to refer to the OPRHP Project Review (PR) number noted above.

Sincerely,

R. Daniel Mackay

Deputy Commissioner for Historic Preservation
Division for Historic Preservation

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population, even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information.
2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

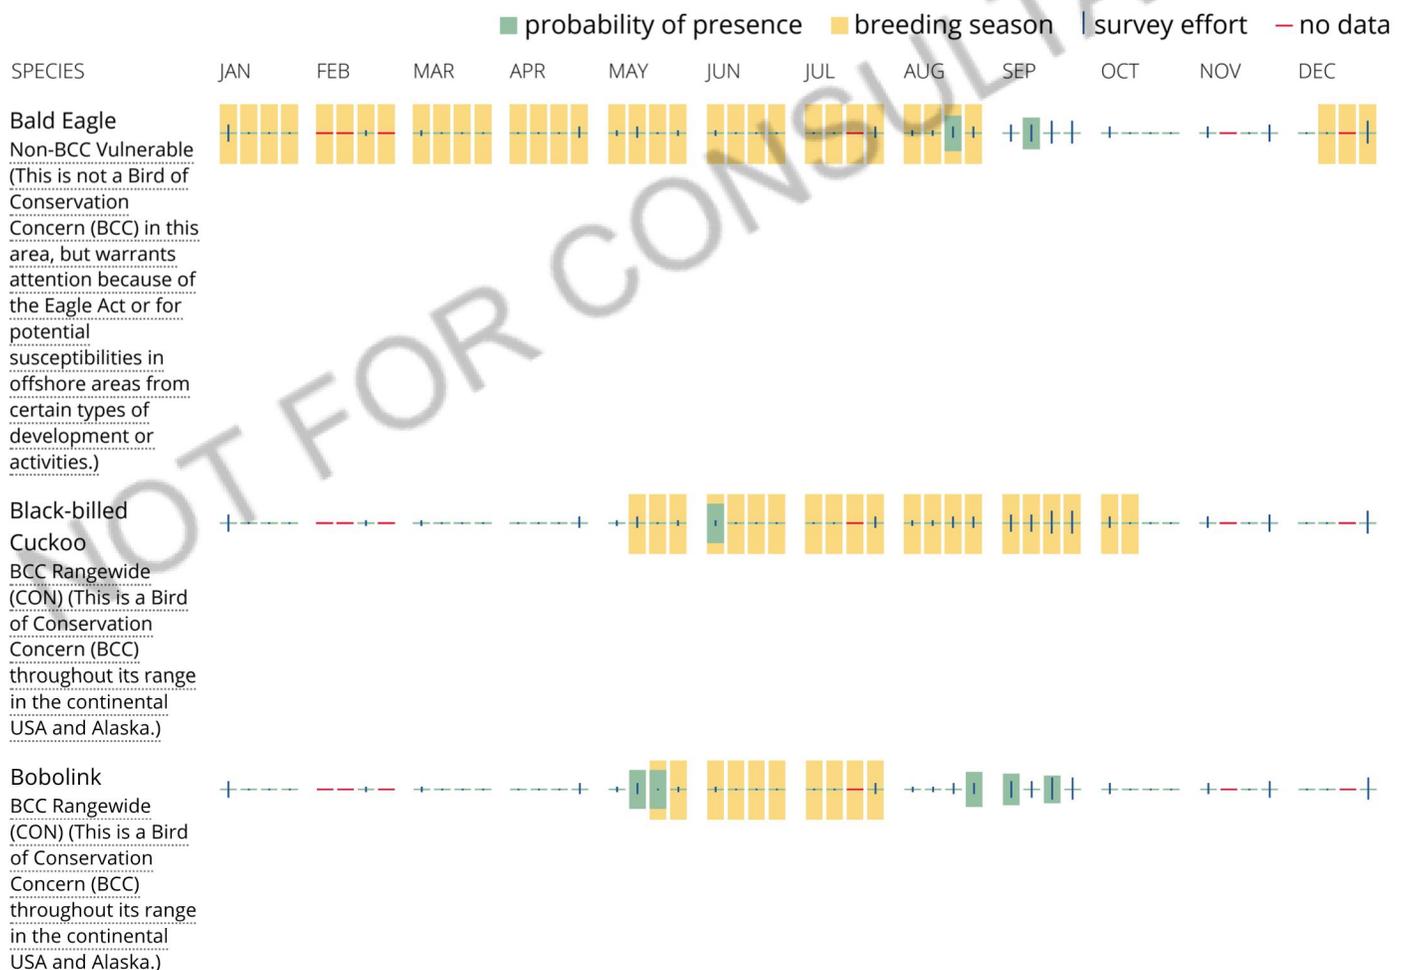

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (-)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) and/or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [AKN Phenology Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

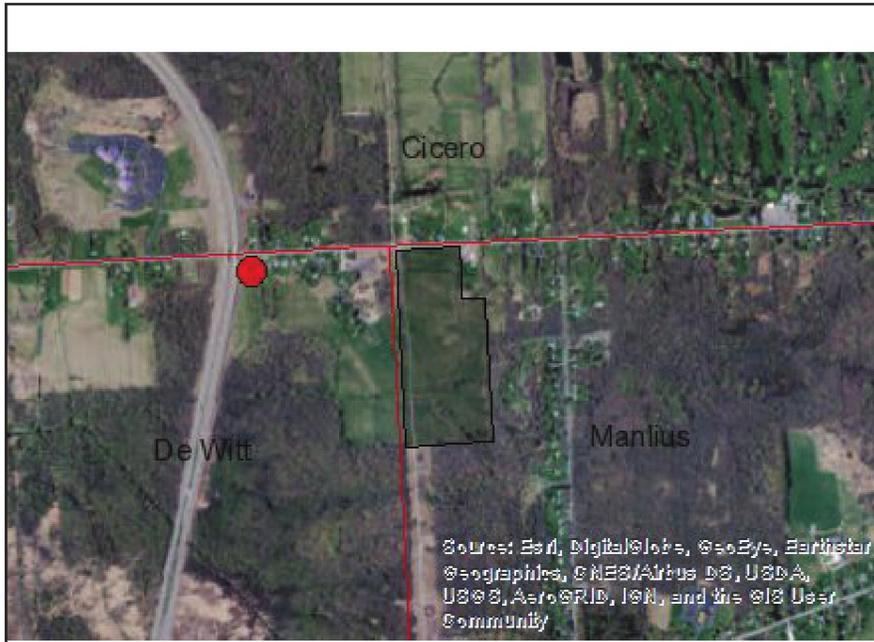

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Town of Manlius Town Board
301 Brooklea Drive
Manlius, NY 13066

RE: Letter of Intent: Source Renewable – Taft Road, Manlius

Dear Town Board Members:

Source Renewables is proposing the construction of one 3.45 MW-AC Photovoltaic Array with battery storage on lands of now or formally Gratzner Family Trust (Tax Parcel 34.00-1-20.1, located on the south side of Taft Road just east of the Dewitt town line. Per Town Code, Section 155-27.2, Solar Photovoltaic Energy Systems, Source Renewable is required to proceed through a Special Permit process to be approved by the Town and Planning Board because the solar array will be the principal use of the parcel. We are requesting to appear before the next Town Board meeting on February 12th to present the project.

The subject properties are a combined 17.3 acre parcel, currently zoned Restricted Agricultural and is currently vacant meadow. The parcel is bounded to the north by Taft Road, to the south and east by vacant land and to west by powerlines and farmland.

The proposed Solar Energy System for the property includes the installation of battery storage and approximately 263 solar tables consisting of 221 full tables with 56 panels/table and 42 half tables with 28 panels per table. There are 13,552 solar panels each standing approximately 9'± in height, 42±" in length and 6.5±' in width. The tables will be spaced at 24.7' intervals. The array will be surrounded by a 6' high chain-link fence with 3-strands of barbed wire affixed to the top for security purposes. For visual screening, a landscape buffer will be planted along the Taft Road frontage.

The electricity produced by the array will be converted from DC power to AC power via string inverters situated under the array panels. The AC power will be collected and transformed to medium voltage power, which will then be sent out via utility distribution. The on-site transformer will be approximately 6' long, 6' wide and stand approximately 5' in height. The on-site main switchgear will be approximately 10' long, 2' wide, and stand 6' in height. The distribution services for the array will utilize the existing utility lines. Therefore no additional roadside powerlines will be required.

A wetland delineation was completed on the subject property by LaBella Associates in July 2019 and is still subject to final determination by the US Army Corps of Engineers. A wetland report will be produced under separate submittal once a final determination has been established. A NYSDEC Wetland permit will be required and obtained for installation of the solar array within the 100' wetland buffer and a USACOE permit will be required and obtained for the culvert installation within the existing ditch. Coordination with the New York State Historic Preservation Office and Federal Aviation Administration has been initiated and is pending. A report will be produced under separate submittal once results have been received. The application for interconnection to the utility grid will be submitted with formal plans before the next meeting.

Source Renewables is proposing that the array is utilized for Community Solar purposes. The Community Solar program will allow local residences and businesses to purchase power from the

array at a discounted rate compared to the current electricity provider. Source Renewables is excited to pursue this project within the Town of Manlius and looks forward to providing an opportunity for clean, alternative energy to the Town and its residents.

We submit the following for your review and consideration:

- Letter of Intent (12 copies)
- Special Permit Application (12 copies)
- Full Environmental Assessment Form (12 copies)
- Presentation/Concept Plan (12 copies)
- Application Fee Check for \$2,450

We look forward to presentation of the project at the February 12th meeting. If you have any questions or require any additional information, please do not hesitate to contact me at (585) 402-7005

Respectfully submitted,

LaBella Associates
